Introducing Hank Jr. - Pullman-Holt’s smallest canister vacuum designed to outperform and outlast competitive vacuums in its class. Hank Jr. has the pick-up power and performance for both commercial or domestic applications. A 1200 watt, dual stage vacuum motor and extra large microfiber cloth filter bag, ensures maximum airflow for extra long work periods without stopping. Interruptions are also avoided via a 40-foot power cord, allowing you to work wide areas without changing outlets. A complete set of tools for above floor cleaning are also close-at-hand, when you need them via the onboard tool caddy. Recommended use is with paper bag and filter in place.

**HANK JR.**
**DRY CANISTER VACUUM**
