

PRE-ES01 1L Electrostatic Sprayer

Michael's Equipment Ltd. PRE-ES01 1L Hand held Electrostatic Sprayer is designed to save time and labour, while spraying less and covering more surfaces.

The PRE-ES01 provides a double charged electrostatic charge to solutions, allowing 360° wrapping of conductive surfaces with an effective and even coverage on shadowed, vertical or undersides of surfaces.

The 24V lithium Ion Battery allows for 1 hour of continuous use. Interchangeable nozzles create particle sizes of 30 or 60 Micron.

The integrated grounding design provides double the electrostatic charge, with no grounding strip to grasp, reducing static or shocking sensations.

Droplet Size	30 / 60 Micron
Flow Rate	9-15 min/lit
Capacity	1.0 lt.
Battery	24V 10ah L-ion
Ship Weight	10 lbs
Run time	1 hour
Recharge Time	3.5 hours
Spraying Distance	up to 6 metres
Electric Motor	250W
